

Setting up CustomHUD

1. Download and install CustomHUD from <http://www.customhud.com/download.html>
2. Run Pokerhound, version of 3.51.5 or more recent.
3. Run CustomHUD.exe from either the startmenu or directory.
4. Open a table and wait for PokerHound to connect
5. Select the 'Custom' mode from the drop down box as shown below, or from the box at the table.
6. You should then see the CustomHUD application connect and to PokerHound, pokerhound comms active is displayed at the bottom.
7. When CustomHUD detects the open table it shows up in the listbox as shown below.
8. Wait one round for the HUD to display on the table.

Running CustomHUD

Reload All – after configuration click [Reload All] to reload all the open HUD's with the newly saved configuration

Configure – to configure the CustomHUD click [Configure] to open the config application.

Override Category - during the game it is possible to change the category on the fly by selecting the game and clicking the [override category] and selecting the new category.

This will override the currently displayed category with the new override selection. This does not effect collection of statistics, it simply changes the display.

HUD display options.

To toggle the Extended HUD on/off - use right mouse click on appropriate HUD

To open and alter player notes at the table - use left mouse click & ctrl key together

To move HUD hold the left mouse button down and move. When moved the positions are saved for each style of table.

Categories can be changed from the main app and using the on table clicker which must be set true in config. (This feature is not fully tested)

Hover over any HUD label to see relevant pop up stats. Hover over player name to see Notes.
